

Let's

STOP

THE DUNOON DAM

for good this time!

HELP PROTECT:

Our Unique Local Rainforest

1% of Big Scrub rainforest remains. The dam would destroy 6.7% of that 1%. The damage would be irreparable.

The Widjubil Wia-bal Sacred Sites

Significant cultural heritage, including burial sites, would be completely submerged.

Important Koala and Platypus Habitat

The dam would impact the vital wildlife corridors that endangered species like koalas depend on for their survival

& Ensure a Sustainable Water Supply

We don't need another dam we need diverse innovative Water solutions like advanced water treatment & recycling plants and desalination plants powered by renewables.
